

PeakPerformance Gym Website Project Proposal

Prepared for: PeakPerformance Gym

Version 1.0

Date: June 2026

Prepared by: Tau Molefe

Organization Overview

PeakPerformance Gym is a modern fitness and wellness brand focused on helping members train beyond their limits through expert coaching, structured programs, and a supportive fitness community.

Target Audience:

- Fitness enthusiasts
- Beginners seeking guidance
- Strength and conditioning athletes
- Group fitness participants
- Individuals seeking personal training services

Website hosted on: <https://github.com/Tau707/ST10479401>

Location: Durban, KwaZulu Natal, South Africa

Website Goals and Objectives

Primary Goals:

- Increase membership enquiries and sign-ups
- Strengthen the gym's online presence
- Showcase classes, trainers, and membership options
- Improve mobile user experience
- Increase search engine visibility

KPIs:

- Increase website traffic
- Increase contact form submissions
- Improve session duration
- Reduce bounce rate
- Grow membership conversions

Current Website Analysis

Strengths:

- Multiple pages covering key business information
- Membership and class information available
- Consistent branding throughout the website

Areas for Improvement:

- Make the design mor modern
- Improve responsiveness across devices
- Enhance calls-to-action
- Improve SEO implementation
- Add conversion-focused user journeys

Proposed Website Features and Functionality

Core Pages:

- Home
- About
- Classes
- Expert Trainers
- Memberships
- Blog
- Contact

Key Functionality:

- Online membership enquiry forms
- Mobile-first responsive design
- Social media integration
- SEO optimisation
- Interactive trainer profiles
- Class schedule presentation
- Lead capture forms

Design and User Experience

Design Style: Modern, energetic, performance-driven fitness aesthetic.

Suggested Colour Palette:

- Black / Charcoal
- White
- Performance Red Accent

Typography:

- Bold display font for headings
- Modern sans-serif for body content

UX Priorities:

- Fast navigation
- Clear membership CTAs
- Mobile optimisation
- Accessibility compliance

Technical Requirements

Frontend:

- HTML5
- CSS3
- JavaScript

Recommended Enhancements:

- Responsive optimisation
- Performance optimisation
- Google Analytics integration
- Search Console integration
- Contact form validation

Timeline and Milestones

Week 1: Discovery & Planning
Week 2: Information Architecture
Week 3: Wireframes
Week 4–5: UI Design
Week 6–8: Development
Week 9: Testing & QA
Week 10: Launch

Budget Estimate

Discovery & Planning: R5,000

UI/UX Design: R12,000

Development: R25,000

Testing & Optimisation: R4,000

SEO Setup: R3,000
